PROJECTS

Weather App — API Integration May 2025 – Jul 2025

HTML, CSS, JavaScript, OpenWeatherMap API

- Deployed a web application fetching and displaying live weather data using a public REST API.
- Implemented asynchronous JavaScript with async/await for API calls and dynamic data rendering.
- Designed a responsive UI to display real-time weather conditions across device sizes.

Personal Portfolio Website Jan 2024

HTML, CSS, JavaScript, React.js

- Deployed a personal portfolio website showcasing projects, technical skills, and resume.
- Optimized responsive layouts for compatibility across devices and major browsers.
- Implemented clean navigation and modern UI components to enhance user experience.

To-Do App with Authentication Aug 2022 – Sep 2023

JavaScript, Node.js, Express.js, MySQL

- Engineered a full-stack To-Do application with user authentication and session management.
- Implemented CRUD (Create, Read, Update, Delete) operations for personal task management.
- Designed a MySQL database schema to store user-specific tasks with persistent state management.
